

Sequencing Task Unintentional Moves Tally

Instructions for Experimenter:

Tally one unintentional move if a card is picked up *or* placed and the subject clearly and unambiguously did not intend it to happen.

Example: a subject's hand slips and she accidentally places the card in an empty space. She says "oops." Tally one unintentional move.

If a single card is unintentionally picked up *and* placed, this counts as only one unintentional move.

Example: the subject accidentally double-clicks on a card, and it is picked up and quickly put back down). Tally one unintentional move.
